For Immediate Release

Online Registration Opens for Powerful Event

Dallas, Texas, January 27, 2010 CONSTRUCT2010 and The Total Facility Management Show online attendee registration opened today. This industry co-located event provides a substantial education agenda, an array of commercial, institutional and industrial building industry specific programs and special events and is host to the Construction Specification Institute's (CSI) Annual Convention. The event is geared to meet the education, networking and informational needs of architects, designers, specifiers, engineers, facilities managers, building owners and professionals who design, build, operate and renovate. "We have developed a powerful agenda to provide a quality, relevant educational and professional experience to help our attendees compete in today's environment and in the future." says Jayne Dalton, Show Manager.

The four-day education schedule, with over 75 sessions, offers relevant, interactive, expert-led instructive programs and on-floor "how-to" training sessions focusing on building & design, business, leadership, process, standards, stewardship and facility management. Most courses provide continuing education credits for CSI CEUs, AIA/LUs, SDs and HSWs. The education schedule allows plenty of time to explore the exhibit floor with non-conflicting time to attend the sessions. On-show-floor education is provided free of charge to attendees in the Education Pavilion during Exhibit Hall hours.

In the Exhibit Hall, attendees will have the opportunity to explore hundreds of relevant products and problem-solving solutions as well as the latest products in the New Product Pavilion and sustainable products in the Green Pavilion. Event participants can experience the value of networking and relationship building as a broad spectrum of industry professionals convene in one place. A special events line-up includes a General Session that focuses on innovation with keynote speaker, Bjarke Ingels, award-winning architect and author, a Welcome Reception and a strong CSI agenda (including Certification Exams, association annual meeting, Honors and Awards Gala and Fellowship events). Technical Tours, a Spouse/Guest program, Student Competition and programs specifically for the Emerging Professional are offered.

Online Attendee registration is available at www.CONSTRUCTshow.com and www.TheTFMshow.com. For those registering before April 8, 2010, Exhibit Hall admission is free and discounted education packages are available. Those registering as CSI Members receive the association discount.

The TFM Show and CONSTRUCT, formerly the CSI Show, are owned and produced by Hanley Wood. The event will take place May 11-14, 2010 at the Pennsylvania Convention Center, Philadelphia, Pennsylvania in conjunction with the 54th CSI Annual Convention. Discounted hotel and travel are available through the official travel provider, www.HanleyWoodHousing.com.

About Hanley Wood

Hanley Wood, LLC is the premier media company serving housing and construction. Through four operating divisions, the company produces award-winning magazines and Web sites, marquee trade shows and events, rich data and custom marketing solutions. The company also is North America's leading publisher of home plans.

Hanley Wood Exhibitions (Dallas) conducts events serving the industry's strongest market segments, including World of Concrete, one of the top 20 trade show events in the country.

Founded in 1976, Hanley Wood is one of the ten largest B-to-B media companies in the United States. Hanley Wood is owned by affiliates of JPMorgan Partners, which uses CCMP Capital Advisors to manage this investment.

About CSI

CSI is a national association dedicated to creating standards and formats to improve construction documents and project delivery. The organization is unique in the industry in that its members are a cross-section of specifiers, architects, engineers, contractors and building materials suppliers. The organization has 146 chapters and more than 15,000 members. Monthly Chapter meetings allow members the opportunity to communicate openly with their counterparts and exchange information for successful project management.

CSI is renowned in the industry for its rigorous certification programs for professionals seeking to improve their knowledge of accurate and concise construction documents. CSI provides continuing education, professional conferences and product shows. For more information, visit www.csinet.org, or call 800.689.2900.
